

WOLVERINE

## Residential Markets

*You want to provide "home sweet home"...*

*... We want to provide additional peace of mind so you can.*

All people want to feel safe in their home environments. This could be in single family homes, apartments, dormitories, hotels, or wherever people call home. Wolverine Fire Protection can provide that extra system to make them feel more at ease. Fire suppression systems reduce the number of injuries and amount of damage in residential structures with the added bonus of possible insurance savings.

Wolverine Fire Protection Co has completed over \$23 million of residential projects, and we carry the proper skills and knowledge to design and install systems in all types of residential structures. Our diverse experience provides us with a vast knowledge base to generate solutions for a customer's needs, and contributes to an efficiently maintained project schedule. The outcome is a quality system with lower life cycle costs and minimal project schedule delays.

### System Experience:

- *Extension & repair of existing systems*
- *Installing in historical buildings*
- *Designing and installing in unique structures*
- *Complete new construction*
- *Design-build systems*
- *High rise residential projects*

Offering high quality professional fire protection  
and a solid commitment to the preservation of  
lives and property since 1958
